

WEEKLY WEALTH REMINDER (WEEK #XX) TEMPLATE

	Reminder Details
<input type="checkbox"/>	<p>Car/Truck - Check Fluid Levels: Your car may use up to seven different fluids to keep it running and operational; radiator fluid, power steering fluid, brake fluid, engine oil, automatic transmission fluid, air conditioning coolant and windshield cleaning fluid. Except for air conditioning coolant, I check fluids monthly to make sure levels are appropriate. Older or high mileage vehicles may require more frequent checks. Each fluid has its own requirement for replacement. Some manufacturers do not provide a schedule to flush or replace the fluid. Engine oil is listed as a separate reminder in these posts because it's changed more often than the other fluids.</p>
<input type="checkbox"/>	<p>Tire Air Pressure: Check periodically or when your car's tire pressure monitoring system indicates low air pressure to ensure vehicle safety and improve gas mileage. Every day visually your tires as you approach your vehicle. Each month check your tire pressure with a tire pressure gauge. The cheap one or two-dollar gauges probably aren't worth it and the gauges at the gas stations may be broken or inaccurate.</p>
<input type="checkbox"/>	<p>Car/Truck - Air Filter Replacement: Follow your vehicle's preventive maintenance schedule for the engine air filter replacement. It's usually every 15,000 to 20,000 miles. If you also have a cabin filter, replace it as needed. Depending on your driving habits, your air filter may need replaced once a year for average driving or sooner if you drive more.</p>

I hope you find this weekly reminder of value. Please visit my blog at www.WidowedCommunity.com for blog posts related to financial knowledge, know-how and wisdom for high net worth widows and widowers.
